

# NATURAL BEAUTY RESTORED

By  
**DR. GEORGE SANDERS**  
ENCINO, CALIFORNIA

**D**edicated to helping patients achieve the results they desire, Dr. George Sanders uses imaging technology in his practice, primarily for his facial surgery patients. He also uses a type of tummy tuck technique that allows for a lower chance of fluid collections afterward, and in some cases, allows for no drains at all. Minimal scar breast lifts are used whenever an excellent result can be obtained, and facelifts are performed under local anesthesia when a more extensive lift is not required. "All surgeries are done at the fully certified Encino Surgicenter, located adjacent to my office. Patients can choose either a sedation or local method of anesthesia depending on what best suits their surgical needs."

“

*The natural look is making a comeback.*”
